Continuation of Substance of Interview including description of the general nature of what was discussed: Applicant's representative contacted Examiner regarding application 09/237,099. Applicant's representative requested status information regarding the application. The Examiner indicated that further clarification in regards to the claim limitation was needed to place the application into condition for allowance. The Examiner indicated that the independent claims would need to state more clearly the synchronizing of the related metadata with and to the digital encoded audio data taught within the enabling portions of the specification (see page 35, lines 13-32, page 36, lines 9-23, page 37, lines 18-30, page 38, lines 3-13). The Examiner indicated that this could be done by Examiner's amendment. Applicant's representative agreed to these suggestions as well as making the changes by Examiner's amendment. The Examiner contacted Applicant's representative Mr. Stewart on 05 April 2005, regarding possibly changing the claim language to state that said related metadata is synchronized to said digital encoded data instead of "in synchronism with". Applicant's representative agreed to this suggestion. Applicant's representative gave approval to an Examiner's Amendment.
